5. Paid sick leave
 - a. Any paid sick leave program, while beneficial both for employers and their workers, must be carefully tailored to reduce substantial costs for companies. In the current economy, we must be careful not to reduce a company's ability to expand hiring. I would support a program that met these requirements.
6. Paid family leave
 - a. Support
7. Minimum wage
 - a. We must ensure that our minimum wage laws are comparable with neighboring states—both in order to maintain competitiveness for New Jersey businesses and to protect workers' rights. I would support legislation in pursuit of that goal.

14. Landlord/tenant covenant revision. Historically, NJ has always led the pathway for protecting tenants. I would be in favor of making revisions for the NJ Landlord Tenant Laws so that these protections are continued, but that we not make the burdens too high for those law abiding landlords from regaining their properties back when tenants fail to abide by the terms of the lease.
15. Linked Deposit Legislation
 - a. Support
16. Mortgage Assistance Program
 - a. I support funding the Mortgage Assistance Program, but only if an adequate source of funding could be identified.
17. Foreclosure assistance
 - a. It is important to me that we assist individuals going through a foreclosure. I would support the Foreclosure Rescue Fraud Prevention Act which would minimize the negative impact of foreclosures on New Jersey families.

19. EITC

20. Income tax rate
 - a. I am in favor of a progressive tax system, in particular through the reinstatement of the Millionaire's Tax. Any funding generated through such a law must be spent on property tax assistance for New Jersey homeowners.
21. Income tax rate
 - a. I am in favor of reinstating the Millionaire's Tax, provided that all funding generated this way is directed to property tax assistance.
22. Telecommunication deregulation
 - a. In principle I am in favor of deregulation because more and more residents are utilizing mobile phones or internet based phone systems. However, I would need to examine specific proposals to ensure that consumers are not unduly harmed in the process.
23. New Jersey Universal Service Fund
 - a. Support, but it would be important to me to ensure that normal ratepayers are not significantly injured by the associated fees given the current economic conditions.
24. Clean Energy Fund
