5. Paid sick leave
 - a. I support paid sick leave programs. They benefit employers by reducing the spread of contagious illnesses, which is especially important in child care and food service. However, I'm concerned that the timing is wrong in the current economic climate to pass such legislation.
6. Paid family leave
 - a. Support
7. Minimum wage
 - a. Because New Jersey is a small state, we are more vulnerable to competition across our borders. I support increased minimum wage laws, but believe we should be careful to not get too out of step with our neighbors and in the process injure our ability to remain competitive with them.

- 16. Mortgage Assistance Program
 - a. The Mortgage Assistance Program served an important need. I would support restoring funding to it if an adequate source could be identified.
- 17. Foreclosure assistance
 - a. We should provide assistance to individuals going through foreclosure. I would support the Foreclosure Rescue Fraud Act to decrease the negative impact foreclosures have on families as a result of deceptive practices.

- 19. EITC

- 20. Income tax rate
 - a. I am in favor of reinstating the Millionaire's Tax to help support property tax assistance for middle class home owners. Given New Jersey's already heavy tax burden, I would not support additional taxation beyond that.
- 21. Income tax rate
 - a. I would vote in favor of the Millionaire's Tax and use the funding to provide property tax assistance to middle class homeowners.
- 22. Telecommunication deregulation
 - a. It is important to balance deregulation with the need to protect consumers. Provided that protection could be guaranteed, I would support reducing regulations on the telecommunication industry.
- 23. New Jersey Universal Service Fund
